

# Tap Oil T/47P 3D PSTM

---

Inverse Q test 9  
Variable dB boost based on horizon

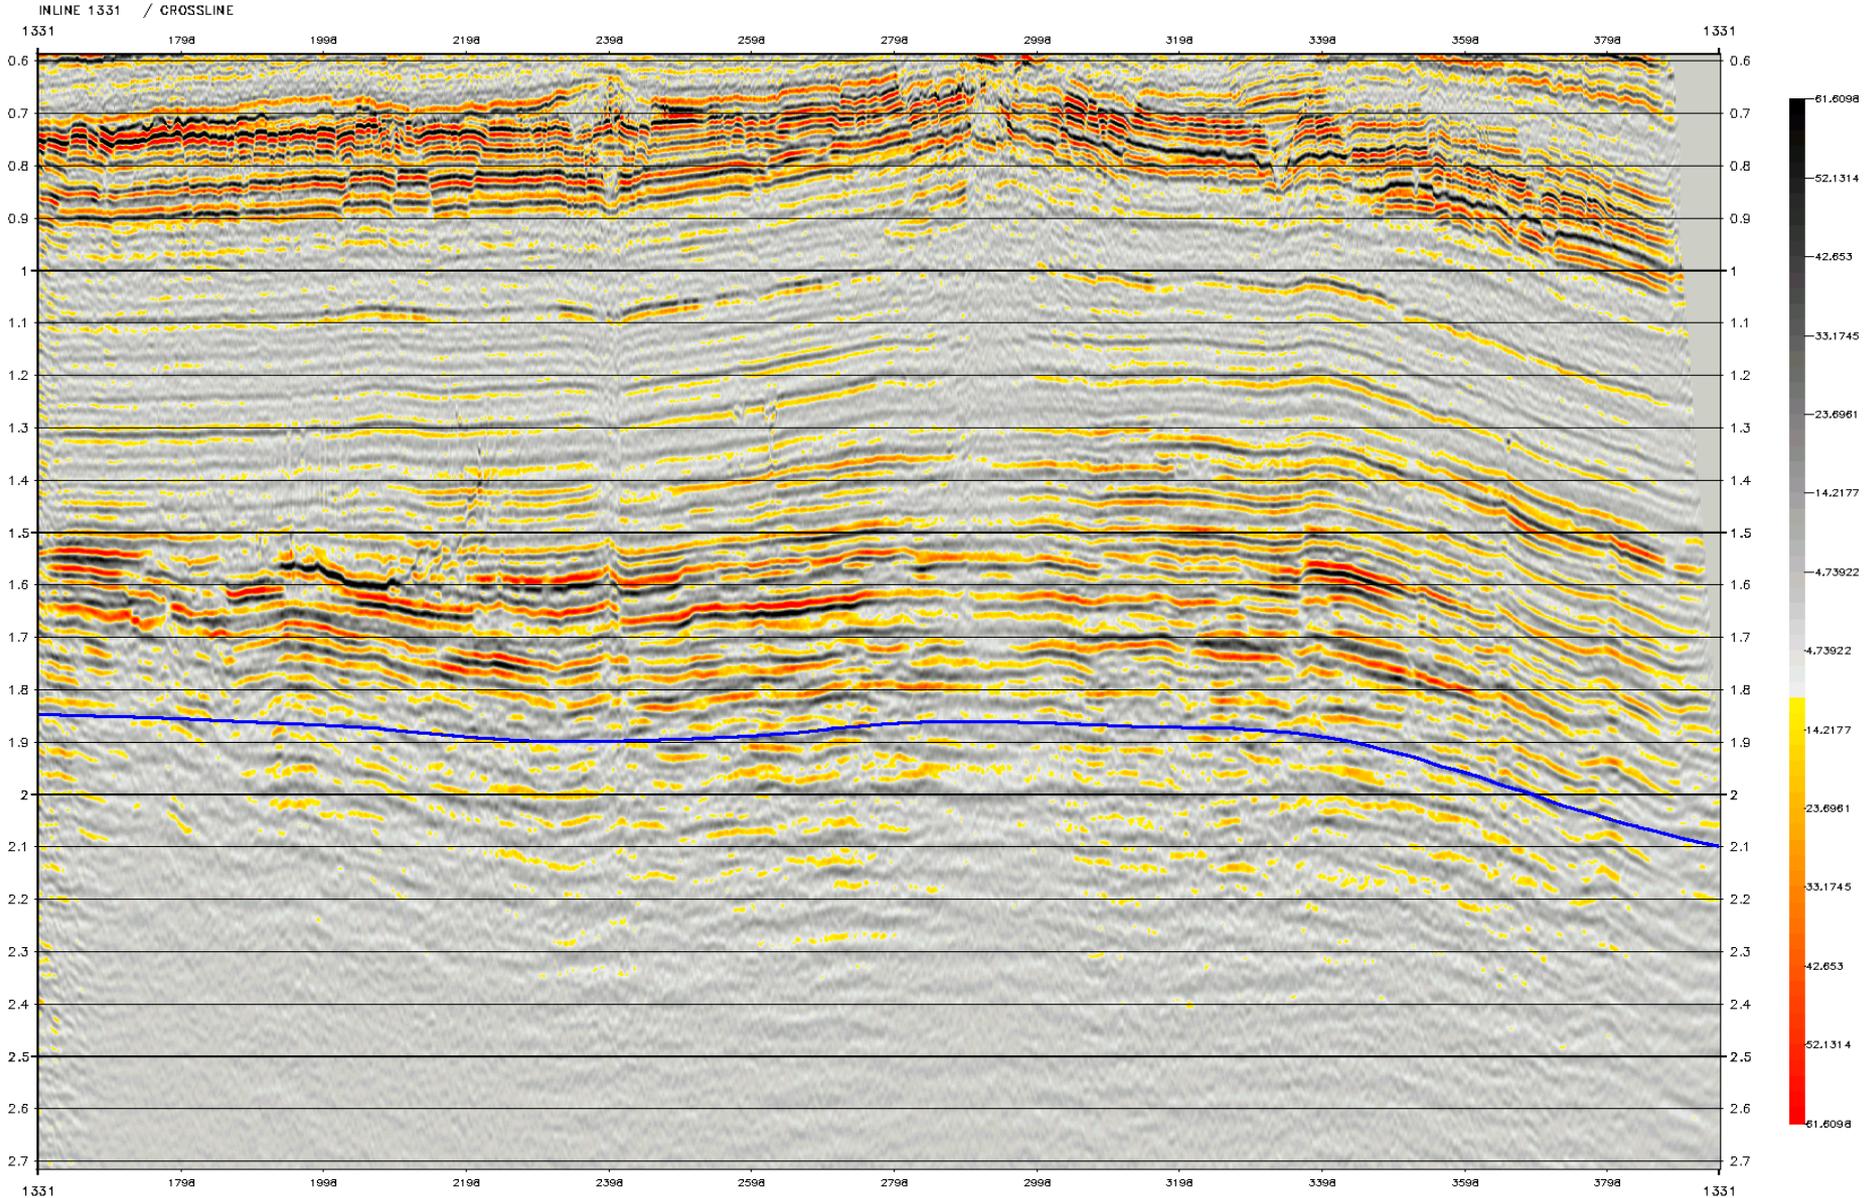

# Summary

- Test is conducted on inline 1331 to test variable dB boost based on horizon (grid values provided by Tap Oil). Following values are used:

Start time	End time	dB boost
0	grid value	25
Grid value	grid value+300	20
Grid value+300	grid value+600	15
Grid value+600	grid value+1100	12
Grid value+1100	6000ms	5
