

COMPANY: Golden Triangle
 PROJECT: Main Creek Magnesite
 HOLE NUMBER: MC 40

828070

Commenced:	15 January 99
Completed:	22 January 99
Logged By:	L A Newnham
Drilled By:	Almac Drilling

Purpose of Hole
To test the southern extensions of Central and Western magnesite zones at relatively shallow depths

Comments on Completion
Intersected 200 m. zone magnesite in FW half of carbonate sequence, at relatively shallow depth; within this zone, there were two high grade zones of mottled magnesite, low in silica and iron; also intersected a broad zone of chalky magnesite, just above 3% CaO but almost devoid of silica.
