

**LEGEND**

- Fe rich HW Schist
  - Pyrite rich FW Schist
  - Schistose units in Carbonate Sequence (sediments, volcanics)
  - Talcose carbonate units near base of Carbonate Sequence
  - Weathered Zone -mainly clays
- MAGNESITE**
- >40% MgO, <3% CaO
  - >40% MgO, >3% CaO
- INTERVALS**
- >40% MgO, <3% CaO

5 cm

**01\_4539**

Report on Drilling Program - January-May 1999 and Magnetite Resource Potential - Main Creek project Golden Triangle Resources NL; Newham Exploration Newham, L.A. 2M/1999; RL2/1988

- NOTES**
- See surface plan for section line locations
  - Reduced Level = MSL+2000m

828416
