

SECTION BASE LINE - LONGITUDINAL PROTECTION REFERENCE PLANE

LEGEND

- Fe rich HW Schist
- Pyrite rich FW Schist
- Schistose units in Carbonate Sequence (sediments, volcanics)
- Talcose carbonate units near base of Carbonate Sequence
- Weathered Zone -mainly clays

- MAGNESITE**
- >40% MgO, <3% CaO
 - >40% MgO, >3% CaO
- INTERVALS**
- >40% MgO, <3% CaO

01_4539

Report on Drilling Program - January-May 1999 and Magnetite Resource Potential - Main Creek project Golden Triangle Resources NL; Newnam Exploration Newnam, L.A. 2M/1999; RL2/1988

- NOTES**
- See surface plan for section line locations
 - Reduced Level = MSL+2000m
