Location Plan Showing Area to be Relinquished

1. EXPLORATION OBJECTIVES

EL 22/1997 of 14 square kilometres was acquired by Allegiance Mining NL to cover an area west of Zeehan considered prospective for Carboniferous nickel skarn deposits of the "*Avebury type*", developed within altered ultramafic formations in the Heemskirk Granite hydrothermal aureole.

2. EXPLORATION COMPLETED

The following work was completed on the licence:

- high resolution aeromagnetic survey
- detailed ground geological mapping
- lithogeochemical sampling in association with ground mapping

Detailed results of this work are contained in the reports listed below.
