

Exploration Licence : 36/2006

Area : 36 Km²

Location : Upper Stowport

Anniversary Date : 26/01/2008

Licence : Red River Resources Ltd

Area to be Reduced : No

Summary of Exploration Work

The lease is one of a group of 7 leases held by either Red River Resources Ltd or Iron Mountain Mining Ltd and managed by Iron Mountain Mining Ltd as part of the Blythe Joint Venture.

During the current year work on this lease has involved general reconnaissance, research of historical data, compilation of aeromagnetic data only. Other work has been conducted in adjoining lease areas and it is expected that work will be extended into this lease in the coming year.

Proposed Exploration

During the early part of 2008 a series of holes will be drilled to test an area of magnetite mineralisation in the Hampshire and Kara areas on EL 37/2006, EL 18/2007 and EL 53/2007. Other targets are being developed and the work conducted in the Hampshire and Kara areas will be used as a model to allow the definition of targets in the lease area.

Environmental Impact Activities

No activities causing an environmental impact were carried out during the current reporting period.

Rehabilitation

No ground disturbance occurred and no rehabilitation work was carried out during the reporting period.

Proposed Expenditure for next year (2008)

\$ 20,000
