Dear Alison,

RETENTION LICENCE RL10/1988 AT MOINA ANNUAL REPORT (TCR 08-5735)

As discussed during our telephone conversation on the 5th January 2009, I am disappointed to advise that no report was forthcoming from Wolfram Bergbau in relation to the testwork that was undertaken by them in Austria on the Moina drill core obtained from the MRT Core Store. They were interested only in the tungsten component of the mineralisation and have now indicated that they have no further interest in the Moina project.

The remaining core has been forwarded to Minersa in Spain (from Wolfram Bergbau) and they have commenced testwork. Their interest is primarily in the fluorite and to date Minemakers has received only email correspondence from them, which is attached.

Sincerely,

PP
Russell Fulton
Geological Manager
