

LEGEND

- QUATERNARY**
 - Quaternary sediments
 - DEVONIAN**
 - Devonian quartz-feldspar-hornblende granite
 - Eldon Group**
 - Devonian siliclastic sandstone, siltstone and minor conglomerate
 - SILURIAN**
 - Eldon Group**
 - Silurian siliclastic sandstone, siltstone and minor conglomerate
 - ORDOVICIAN**
 - Gordon Group**
 - Ordovician limestone.
 - Owen Group**
 - Ordovician siliclastic conglomerate and sandstone
 - CAMBRIAN**
 - Dundas Group Correlate**
 - Massive, polymict volcaniclastic conglomerate, sandstone and siltstone, intense actinolite-silica alteration
 - Laminated siltstone and sandstone
 - Limestone and dolomite
 - Rhyolite lava and breccia
 - Crimson Creek Formation**
 - Massive graded, feldspar-lithic greywacke, phlogopite-biotite alteratik
 - Laminated-black shale, pyrrhotitic
 - Mchvor Hill Complex**
 - Mineralised ultramafic
 - Serpentinised ultramafic or ultramafic skarn, unmineralised
 - Gabbro, feldspar-pyroxene gabbro
 - Basalt (High Mg boninites)
 - Aphyric basalt
 - PROTEROZOIC**
 - Oonah Formation**
 - Siliclastic siltstone, sandstone and minor dolomite
 - Limestone and dolomite
 - OTHER**
 - Intensely altered basaltic volcanics
 - Skarn, tourmaline-actinolite-axinite
 - Massive Magnetite
- Fault
 Fault zone
 Geological contact
