

Macquarie Harbour Mining Ltd Tenements – NE Tasmania Revel Munro Geographic Description Area Mapped as Tertiary Sediment Sequences (some overlaid by Quaternary layer) SEE also MAPS for locations	Revels Prospectivity Ranking  see below	Possible further investigations	Field Investigation Degree Prospected through to exploited by mining	Estimate % of past alluvial tin production (on MHM held gnd)	Past Investigations Degree Previously Reported	Degree of RAAM scrutiny Records (To date)	Degree of RAAM scrutiny Field (To date)	Additional Info to be forthcoming from RAAM Found Seeking	Existing Reserves Stated	Exploitation Constraints	Exploitation Advantages	
1 North Mt Cameron Fire Trail ~ Nth East Slopes	2	Field Appraisal	Assumed little or no mining or exploration	0	None known	None	None			Environmental, little disturbed	Accessible	1
2 Fly By Night Area ~ Tertiary Sediment Component	3	Field / Desk Appraisal	High level mining, High level of testing	1	Numerous reports	Some	Some	Found		Proximity to Gladstone	Already impacted by mining	2
3 Mick Fenner's Paddocks (Pasture RHS approaching Gladstone from Pioneer)	3	Field Appraisal	Little or no mining or exploration	0	None known	None	Minor			Freehold Land	Accessible	3
4 Junction of Gladstone Rd & Ogilvie's Bridge Road	6		None known	0	None known	None	None			Too public. Roads dissect		4
5 Enterprise & other workings, Later working known as Warbys	3	Field Appraisal	Numerous extensive workings	5	Minor references in Gov. reports	Some	None			Bit fragmental, rugged	Already impacted by mining	5
6 Jewels Flats & other workings	2	Field Appraisal	Numerous extensive workings	4	Minor references in Gov. reports	None	None			Bit fragmental, rugged	Already impacted by mining	6
7 Empress	3	Field Appraisal	High percentage of ground worked, no testing	3	References in Gov. & O/F reports	None	Minor	Found	Small	Bit fragmental, rugged	Hidden	7
8 Tamar	3	Field maybe sampling by pit work	High percentage of ground worked, some testing	3	References in Gov. & O/F reports	Some	Some	Sought – Almost at a dead end		Fragmental, rugged	Already impacted by mining	8
9 Lawrys / Star Hill / Garfield	3	Field maybe sampling by pit work	High percentage of ground worked, some testing	40	References in Gov. & other reports	Considerable	Some	Sought – Almost at a dead end		Fragmental	Already impacted by mining	9
10 Tract of Land Btn Garfield & Cybele Ck	2	Field / Sampling by pit work	Little or no mining some exploration	0	References in Gov. & O/F reports	Considerable	Considerable	Sought–Not yet found			Remote	10
11 Tract of land Sth of Cybele Creek inc Traceys	1	Field / Sampling by pit work	Some extensively worked ground worked, some t	3	Minor references in Gov. & O/F reports	Considerable	Some				Remote	11
12 Lark Creek area inc Andrew Duncan Scraper workings	3	Field maybe sampling by pit work	High percentage of ground worked, some testing	5	Minor references in Gov. & O/F reports	None	Minor				Already impacted by mining	12
13 Moores Workings & Land west of the access road	4	Field Appraisal	Some worked ground worked, a little testing	1	None known	None	None					13
14 Edina (Include part of the Andrew Duncan scraper operations)	5		High percentage of ground worked, tested	7	References in Gov. & O/F reports	Minor	Minor	Found	Small	Fragmental	Already impacted by mining	14
15 Arcadia	5		High percentage of ground worked, tested	6	References in Gov. & O/F reports	Minor	Minor	Found	Small		Already impacted by mining	15
16 Tract mainly paddocks, Garfield Ck to Elizabeth Mine area	3	Field maybe sampling by pit work	Small percentage of ground worked, minor testing	0	Minor references in O/F reports	Some	Considerable			Clash with Agriculture		16
17 Tract mainly paddocks ~ north of the Elizabeth Mine	4	Field Appraisal	No ground worked, minor testing	0	Minor references in O/F reports	None	Minor			Clash with Agriculture		17
18 Musselroe River Downstream of Browns Bridge to Icena ~ West of River	4	Field Appraisal	Assumed little or no mining or exploration	0	None known	None	None			Clash – Agriculture & Environmental		18
19 Musselroe River Downstream of Browns Bridge to Icena ~ East of River	4	Field Appraisal	No mining or exploration	0	None known	None	None			Clash – Agriculture & Environmental		19
20 Musselroe River Upstream of Browns Bridge to Bowens Sugar Loaf i.e. east of River	4	Field Appraisal	Assumed little or no mining, some exploration	0	References in O/F reports	Some	None			Clash – Agriculture & Environmental		20
21 Musselroe River Upstream of Bowens Sugar Loaf i.e. east of River	4	Field Appraisal	Assumed little or no mining, some exploration	0	Minor references in O/F reports	None	None			Accessibility	Remote	21
22 Musselroe River & Lead west of river–Edina Sugar Loaf area	2	Field / Sampling by pit work	Minimal mining, some exploration	0	Minor references in O/F reports	Some	None			Some Environmental	Remote	22
23 Musselroe River & Lead west of river–Edina & Syphon No3	3	Field maybe sampling by pit work	Minor early mining?, some testing	0	Minor references in O/F reports	Minor	Minor			Some Environmental		23
24 Lanka Area	5		High percentage of ground worked, no testing	3	None known	Minor	Minor			Accessibility		24
25 Amber Hill	1	Field Appraisal by Drilling	Partly worked, considerable testing	5	None known	Considerable	Considerable	Found	Small to medium	Accessibility	Already impacted by mining	25
26 Amber Creek	3	Field maybe sampling by pit work	Minor workings, some testing	2	References in Gov. & O/F reports	Considerable	Some	Found		Accessibility		26
27 North End Lanka Road	5		Little to no workings, minimal testing	0	None known	None	Some			Some Environmental		27
28 Musselroe Lead, downstream of 'Eastern Leads'	5		Some early mining, minimal testing	1	Minor references in Gov. reports	Minor	Some			Accessibility		28
29 2km east Musselroe River area overlaid by basalt	4	Field Appraisal	No mining or testing known	0	None known	None	None			Accessibility		29
30 Musselroe Eastern Leads	2	Field Appraisal	Some worked ground worked, a little testing	1	References in Gov. & O/F reports	Some	Attempted		Yes	Accessibility, environmental		30
31 Woods Flats	5		Partly worked, considerable testing	5	References in Gov. & O/F reports	Some	Some		Remnants–Small	Freehold Land, environmental		31
32 Blowhard Creek Tertiary occurrences	4	Field Appraisal	No mining or testing known	0	None known	None	Minor					32
33 Tebrakunna Road Tertiary occurrences	4	Field Appraisal	No mining or testing known	0	None known	None	None					33
34 Bells Flats	6		High percentage of ground worked, no known tes	4	Minor references in Gov. reports	None	None					34
35 Tertiary Sed Ground part of Van Dieman Mines leases	N/A		Small percentage of ground worked, minor testing	1	Minor references in Gov. reports	None	N/A		N/A	N/A	N/A	35

**Revel has been concentrated his efforts towards the following activities:**

Existing Published materials consulted.... the Utah reports are exemplary!  
 Examination of records that Revel assembled 1979 to 1985 now in the Queen Victoria Museum –some copied  
 Examination of records that Revel personally holds that are the only copies ~ 1000+plans; 1000+ files  
 Following up on leads that Revel remembers which may be relevant to MHM EL's – see notes  
 Drill hole data examination & manipulation  
 Field "refamiliarization" / check geological mapping / access – see notes

**Prospectivity**

100%  
 1 Most worthy of further investigation following further field work & development of an appropriate plan  
 2 Worthy of further desk top & field work maybe leading to exploration activities  
 3 Some merit in respect of further desk top & field work maybe leading to exploration activities  
 4 No known conditions for placer tin, should be examined before being categorically dismissed  
 5 Minor merit in respect of breif further desk top & field work outside chance of factors warranting exploration  
 6 Worked out / not prospective
