

Bell's Hill EL28/2007

Location of sample BH 1

I've scoured the data files available from the lease holders (one is now deceased (Mr Norm Brown of Ringarooma)) and have arrived at an approximate coordinate. The sample Norm was said to have collected came from the rubble around a shaft connected to the Bell's Hill Mine. My calculated coordinates (+50m) are as follows;

568987mE
5436523mN
722RL

Regards

Peter de Vries.
