**LYNCH CREEK
(ALFRED RIVER BLOCK)
EL 1/2009**

**PARTIAL RELINQUISHMENT REPORT
FOR PERIOD ENDING THE 25TH MAY 2010**

Ron Gregory took possession of EL 1/2009 on the 26th May 2009.
The Licence was issued in 2 portions, the western Alfred R. block and the eastern Lynch Ck block

The focus of exploration is the Lynch Creek district to the east of the Huskisson River within the Lynch Ck block, specifically the Lynch Ck prospect.

The Alfred R. block was explored by Ron Gregory in the mid 1980s. Stream sediment sampling on behalf of Black Horse Mining NL was also conducted (88-2847).

A review of the previous exploration for the general area around EL 1/2009 was conducted in 2009/10.

This was much easier than in 1986, due to the reports being digitized and on-line.

This review did not reveal any targets of interest to Ron Gregory at this time.

No ground work was conducted.

A base map was prepared but not therefore required.

A location map is also provided.

The area is therefore surrendered.
