KEY WORDS: Sphalerite, galena, Betts Track, serpentinitised ultramafic rocks, listwanites, Meredith Granite, Heazelwood Ultramafic Complex, alteration, dolomite, sericite, fuchsite, skarn minerals, actinolite, biotite.

MAP SHEETS: SK55-3 BURNIE  
Map 1:50/100,000: Macintosh.  
Map 1:25,000, Luina 3640

ALL COORDINATES WITHIN ARE GDA66, ZONE 55

## **EXECUTIVE SUMMARY**

The Wilson River Project is located in NW Tasmania about 65 kilometres SW of Burnie and 10 kilometres SW of Waratah. The geology of the Wilson River area contains a central band of allochthonous Cambrian serpentinised ultramafic rocks, porphyritic boninitic basalts and andesites of the Heazelwood Ultramafic Complex. Siltstones, greywackes, mudstones and tholeiitic basalts of the Early Cambrian turbiditic Cleveland-Waratah association occur to the west of the allochthonous terrain. The Devonian Meredith Granite intrudes the sequence to the south and east of the tenement area.

No field work was carried out by Jaguar Minerals in this reporting period. Jaguar Minerals have been searching for a joint venture partner.

<b>FIGURE 2: TENURE</b> .....	<b>6</b>

## 1. LOCATION

The Wilson River Project is located 10 kilometres south west of Waratah on the West Coast of Tasmania. Access is gained from Betts Track, an old logging track that comes off the Waratah – Savage River bitumen road, for a distance of 4.5 km (Figure 2). Betts Track is marked on the Luina 1:25K topographic map (3640). The area lies within the Meredith Range Regional Reserve and is overlain by high quality wilderness.

## 2. TENURE

The Wilson River project consists of ELA 23/2003 with an area of 9 km<sup>2</sup>.

Jaguar Minerals obtained the tenement from Herald Resources who had an option to purchase agreement with the tenement holder, New Challenge Resources Pty Ltd. Land tenure within EL 23/2003 is of the Meredith Range Regional Reserve with a very small area on the extreme eastern boundary managed as a Forest Community.
