GEOLOGICAL LEGEND

- geological boundary
- - - geological boundary - inferred
- ? - - geological boundary - highly tentative
- f — fault
- strike of beds
- tuf interbedded tuffaceous sandstone-lithicwacke with siltstone and mudstone
- ltw interbedded predominantly lithicwacke with siltstone-mudstone
- bv extrusive intermediate-basic volcanics
- gb intrusive porphyritic micragabbro-dolerite-lamprophyre?
- pe calc-pelites, black shales, often altered and pyrrhotite mineralised

5 392 000 m N
