Report Title: Surrender Report for EL22/2009 Calder Project, North west Tasmania

Report Period: 21st November 2010 – 20th November 2011

Author: H.Salmon

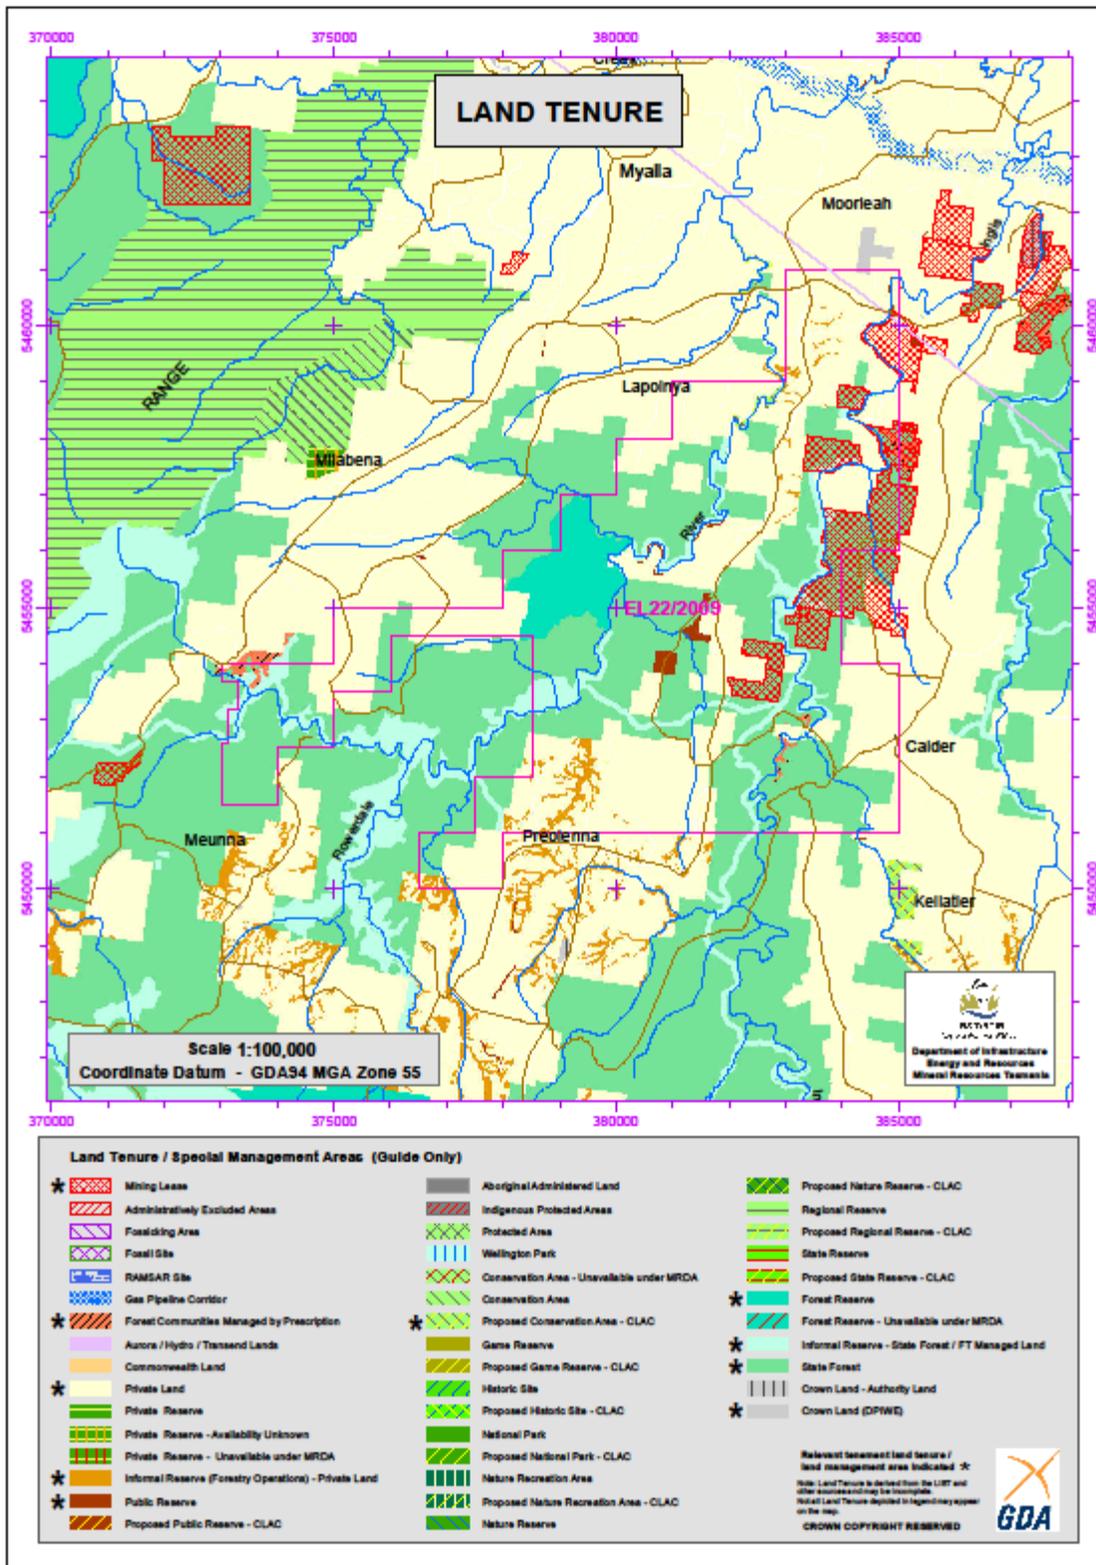

Date of Report: February 2012

1:250,000 Map Sheet(s): Tasmania North West (SK55-20)

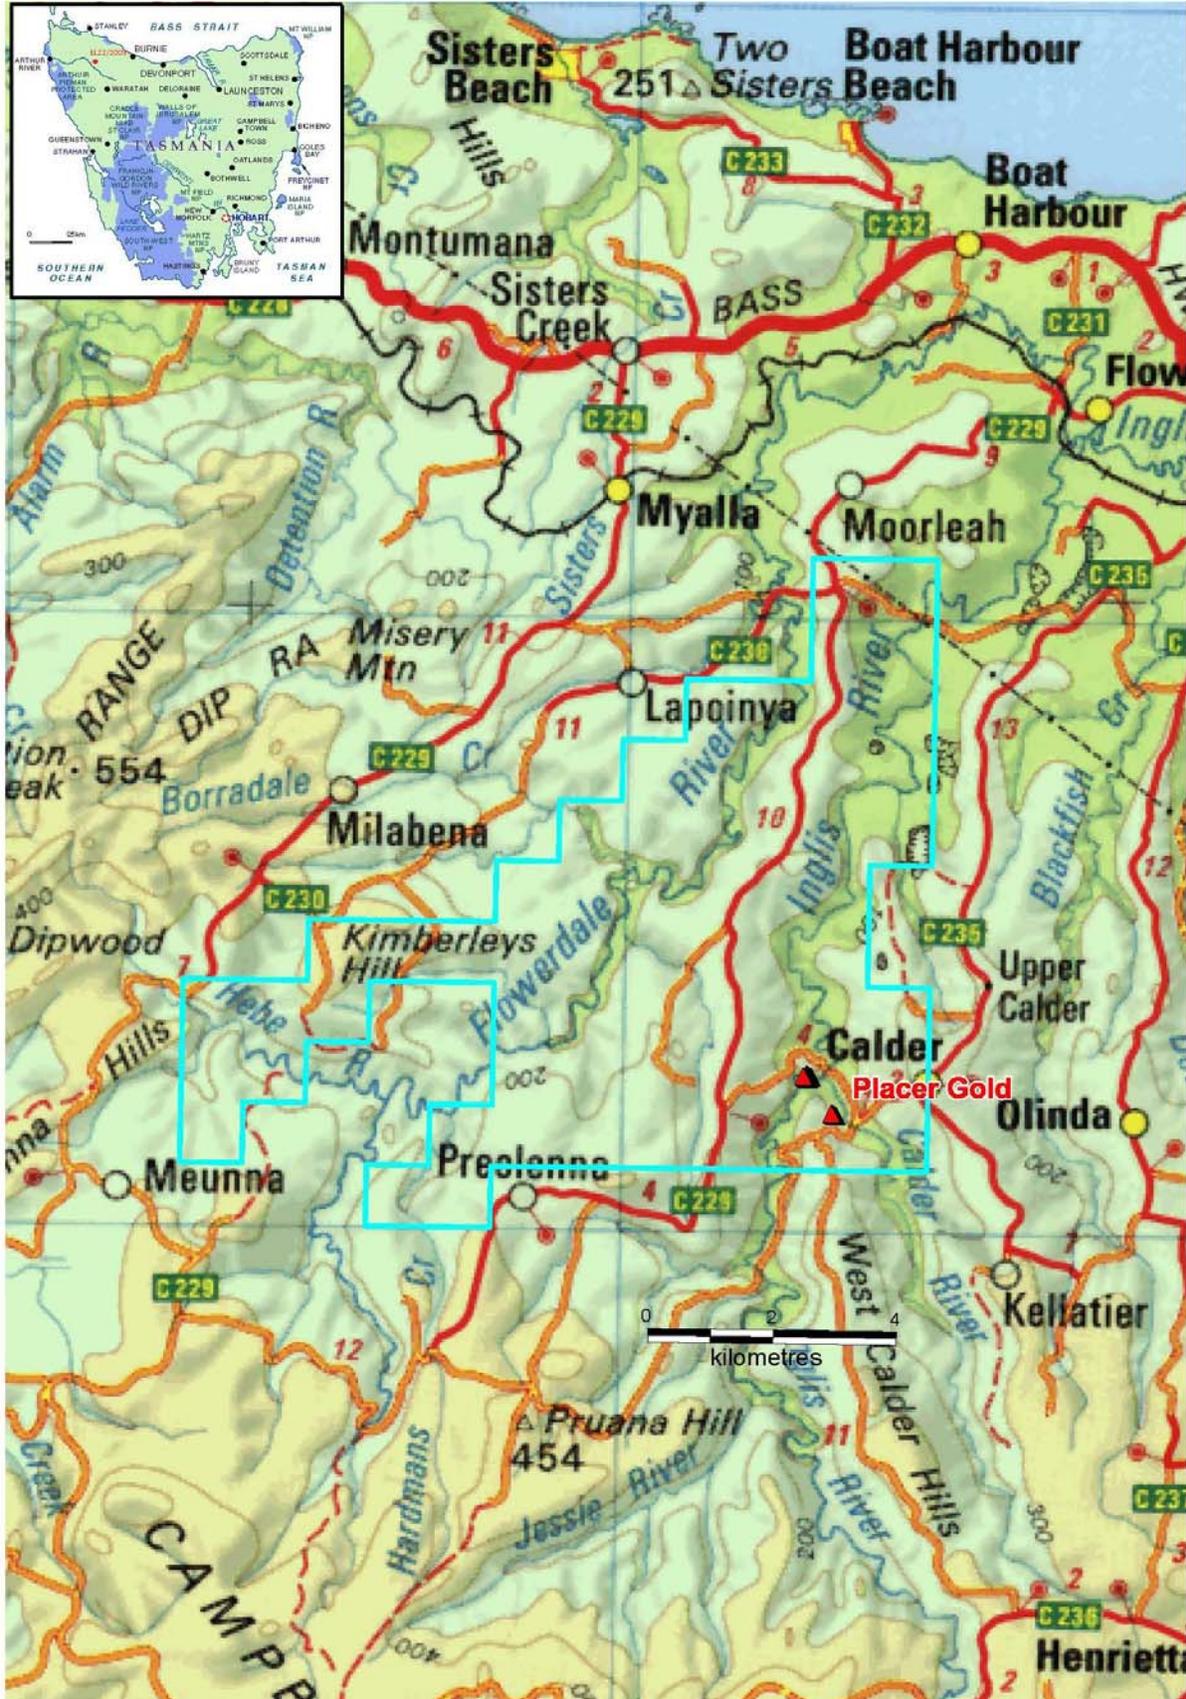

1:100,000 Map Sheet(s): Inglis (8015), Arthur River (7915)

Target Commodity(s): Iron Ore

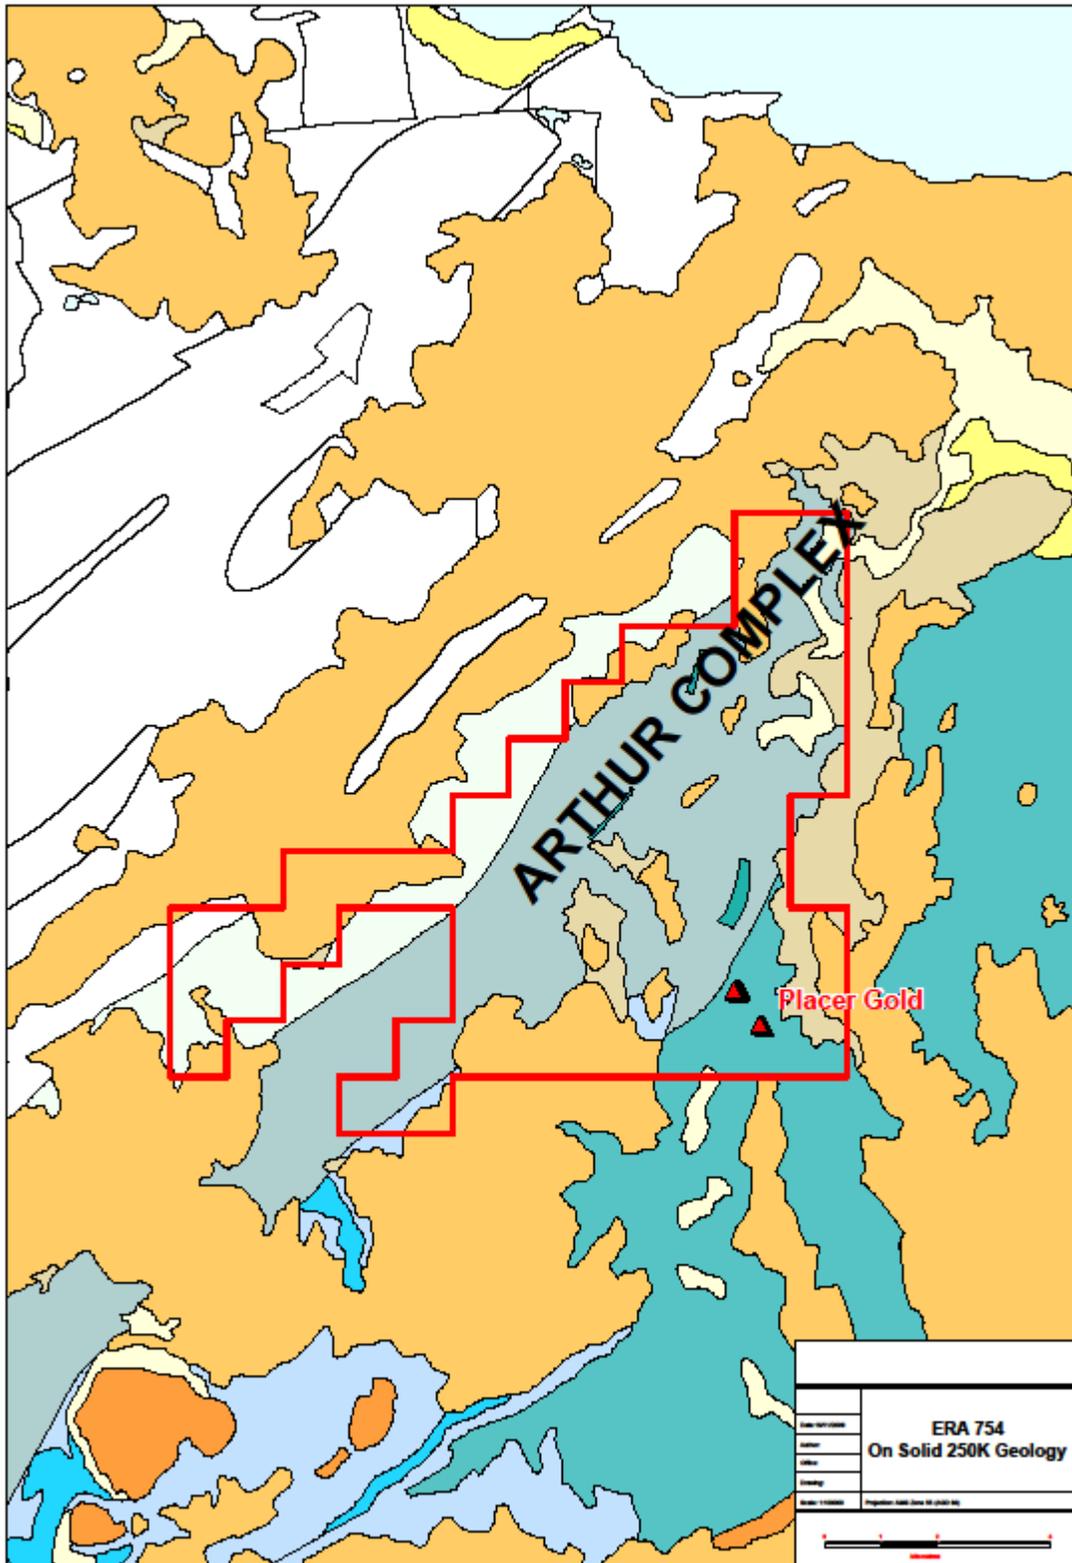

EL22/2209 was applied for on the 3rd December 2009 and granted on 21st November 2010. The tenement covers 56km² and is located approximately in the northwestern region of Tasmania. The company also had a granted tenement at its southwestern boundary and it was hoped to more fully investigate the Arthur River Lineament exploration possibilities across these two tenements. However, after an initial drill programme within EL10/2205 was undertaken some issues were raised regarding the Tarkine. Due to the uncertainty of how this would proceed, the company felt it best to surrender E22/2009 and no work was ever completed.
