

MOUNT DUNDAS PROJECT (EL14/2007) GEOLOGICAL MAP

scale: 1: 10000

legend

- Qha holocene gravel, mud
- Qmgz pleistocene glacial deposit
- Qpbd pleistocene sand and gravel
- Jd jurrasic dolerite with locally developed granophyre
- SDs devonian-silurian sandstone
- SDst devonian-silurian siltstone
- Oms ordovician-cambrian mudstone
- Omspc ordovician-cambrian siltstone
- Omsv ordovician-cambrian conglomerate
- Omsq ordovician-cambrian sandstone
- Csh cambrian shale
- Cdt cambrian mudstone
- Cdsv cambrian sandstone
- Cdsvx cambrian mix sandstone
- complete geological route
- geochemical sample location
- previous geochemical sample
- [k1] important target
- copper anomaly
- lead anomaly
- zinc anomaly
- previous drill location
- tenement boundary
