GEOLOGICAL LEGEND

- CAMBRIAN**
 (correlate of Crimson Ck. formation)
- dr dolerite-porphyrific-andesine/labradorite laths
 - ba metamatised basalts, dolerites and rare gabbros
 - tu hornfelsed lithic tuffaceous sandstones
 - si hornfelsed-highly magnetic volcanomic to lithic sandstones, siltstones and wackes
 - to hornfelsed and tourmalised volcanomic to lithic sandstones, siltstones and wackes.
 - qz tourmaline-microgranular quartz rock-thoroughly metamatised argillaceous rocks
 - sa hornfelsed lithic to volcanomic sandstones, siltstones, wackes - little to no bedding
- MIDDLE SILURIAN ?**
- py highly tourmalised quartz porphyry and greisen
 - gr quartz porphyry, porphyritic biotite granite, quartz feldspar porphyry
