

Legends

Lithology

CVC dacite

CVC rhyolite

Lithoclast / volcanic breccia

Quartz porphyry

Veins

Quartz

Magnetite

Tourmaline

Chlorite

Carbonate

Sericite (phengite, illite and muscovite)

Alteration

K-feldspar

Plagioclase (albite)

Carbonate

Sericite (phengite, illite and muscovite)

Chlorite

Biotite

Tourmaline

Magnetite

Sulfides

Pyrite

Chalcopyrite

Bornite

Secondary copper sulfides

Intensity of alteration or abundance of veins / sulfides

Intense

Strong

Moderate

Weak

Very weak to absent
