8th April, 1957

Interim Report on Geochemical Orientation Survey over Findons, North Darwin

Dates of Sampling: 4th April to 7th April, 1957.

Party Leader: D. Sampey

Personnel Employed: E. Halitzki and D. Bayes

Man Days in the Field: 12

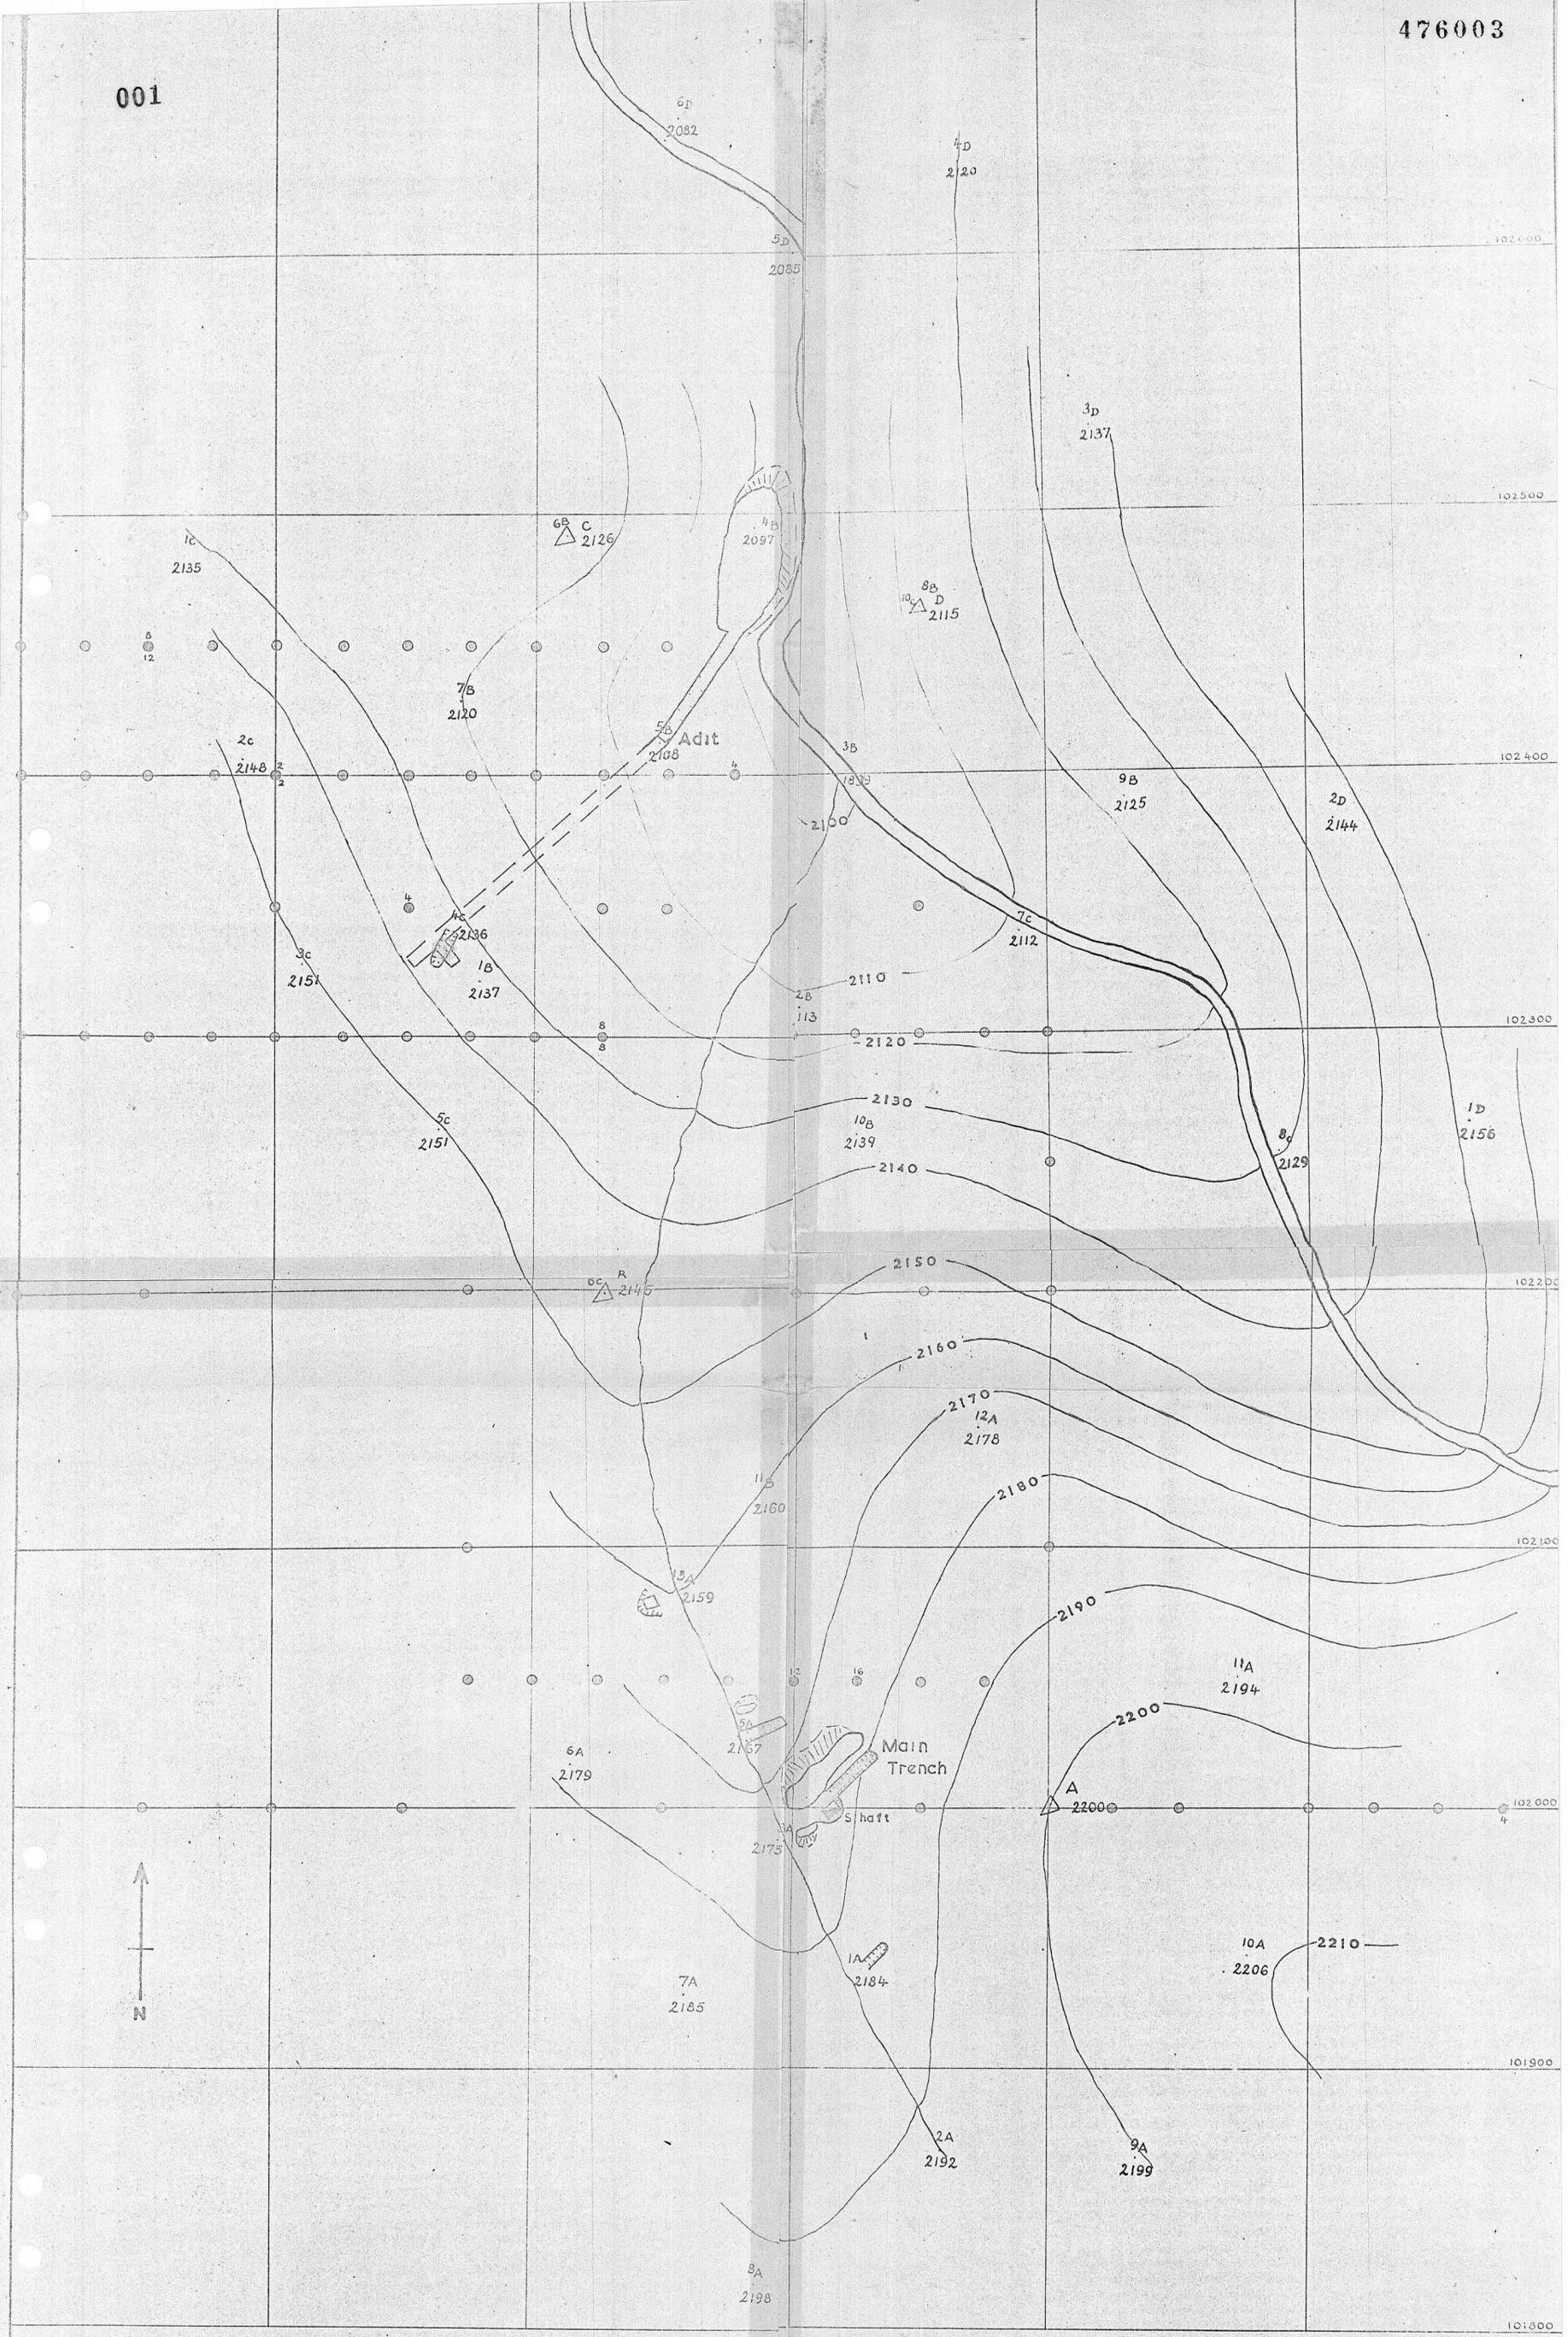

Location of Camp: North Darwin

Means of Transport and Supply: Helicopter, foot and Land-Rover.

General: Soil and/or rock samples were taken at 161 sampling stations. This covered an area of 550 ft. along strike by 400 ft. across strike. For geological details refer to Mr. Wade's report, January, 1957. The final report containing the analytical results will be available after the completion of the King River and Pinnacles sampling campaigns.
