

LEGEND

- Inferred limit of significant Tertiary sedimentation
- Isopachs indicating thickness of Tertiary-Quaternary sediments
- 100
- (35')
- (>190')
- Depth to basement (Dolerite unless otherwise indicated)
- Hole not bottomed

- TERTIARY (Eocene-Miocene) - Quaternary
Tertiary mostly obscured by Pleistocene - Recent alluvium and superficial deposits
- TERTIARY (Pliocene) Basalt
- JURASSIC - Dolerite
- JURASSIC - Predominately Dolerite
- TRIASSIC - Felspathic Sandstone
- TRIASSIC - Knocklofty Sandstone
- PERMIAN - Ferntree Mudstone
