DEPTH

STRATIGRAPHIC DESCRIPTION

- 85-90 Silt, light yellow and brown, coarsely textured, medium to loosely compacted, common yellow clay matrix, scattered coarse grains of quartz
- 90-95 Pebbly sand, clear, smokey, rare orange, fine to coarse grained and pebbly, sub-angular to sub-rounded, poorly sorted quartz, clean, scattered white clay interstitial material, rare reddish brown staining of a few quartz grains, loosely compacted.
- 95-100 Silt, light grey, coarsely textured, moderately compacted, common clay matrix.
- 100-105 Silt, as 95-100 above.
- 105-110 Sand, clean, smokey, medium grained, sub-angular to angular, poorly sorted quartz, dirty, common silty interstitial material, loosely compacted, scattered grains of dark mineral (igneous?)
- 110-115 Pebbly sand, as 105-110 above except coarsely grained, sub-angular to sub-rounded, poorly sorted.
- 115-120 Silty sand, clear, smokey, fine grained, sub-angular, poorly sorted quartz, very dirty, common grey silty interstitial material, loosely compacted.
- 120-125 Silty sand, as 115-120 above, plus rare to scattered orange silty interstitial/staining some of the quartz, rare mica, loosely compacted.
- 125-130 Silty sand, light grey, clear white, finely grained, medium sorted sub-angular quartz, very dirty, common grey clay and silty interstitial material, rare mica, minor grains of black and yellow and brown soft mineral, loosely compacted.
- 130-135 Silty sand, as 125-130 above except finer grained.
- 135-140 Clay, light grey, coarsely textured, moderately compacted, rare carbonaceous specks and finely divided mica, rare orange clay specks.
- 140-145 Clay, as 135-140 above.
- 145-150 Silty sand, white, clear, smokey, fine grained, sub-angular, poorly sorted quartz, very dirty, common grey silty interstitial material, scattered white quartz and clay pebbles, loosely compacted.
- 150-155 Silt, light grey, coarsely textured, moderately compacted, occasional large carbonaceous wood fragments.
- 155-160 Sandy silt, as 150-155 above, except fine grained quartz is common, loosely compacted.
- 160-165 Silty sand, clear, smokey, fine grained, sub-angular, poorly sorted quartz, very dirty, common grey silty interstitial material, rare white clay particles, rare carbonaceous minute fragments, loosely compacted.
