

DEPTH	STRATIGRAPHIC DESCRIPTION
70-75	<u>Silt</u> , medium grey, scattered mica, rare to scattered carbonaceous material, pebbles up to 1/16" diameter of quartz and brown clay.
75-80	<u>Silt</u> , medium grey, brown, minor orange, scattered mica, scattered carbonaceous blebs, fine-medium textured, moderately compacted.
80-85	<u>Silt</u> , as 75-80 above; occasional quartzite pebbles up to 3/4" diameter.
85-90	<u>Silt</u> , medium, brown, grey, scattered mica, rare carbonaceous fragments, medium textured, moderately compacted.
90-95	<u>Silt</u> , as 85-90 above.
95-100	<u>Silt</u> , as 85-90 above except no carbonaceous specks.
100-105	<u>Silt</u> , as 95-100 above.
105-110	<u>Silt</u> , as 95-100 above.
110-115	<u>Silt</u> , medium grey, scattered finely divided mica, finely textured, moderately compacted.
115-120	<u>Silt</u> , as 110-115 above.
120-125	<u>Silt</u> , as 110-115 above.
125-130	<u>Silt</u> , as 110-115 above.
130-135	<u>Silt</u> , medium to dark greyish brown, tinges of orange, scattered finely divided mica, finely textured, moderately compacted.
135-140	<u>Clay</u> , medium greyish brown, scattered finely divided mica, coarsely textured, moderately compacted.
140-145	<u>Clay</u> , medium grey brown, scattered dark reddish brown inclusions, scattered finely divided mica, medium textured, moderately compacted.
145-150	<u>Clay</u> , as 140-145 above, rare orange clay streaks.
150-155	<u>Clay</u> , as 140-145 above.
