DEPTH	STRATIGRAPHIC DESCRIPTION
185-190	<u>Silt and Clay</u> , as 180-185 above.
190-195	<u>Clay</u> , medium and dark brown with occasional orange tinges, scattered light brown silt stringers, scattered to rare carbonaceous wood fragments, scattered yellow and orange brittle glassy mineral, rare reddish-brown clay grains.
195-200	<u>Clay</u> , medium, light brown, orange stringers, scattered light brown silt stringers, scattered carbonaceous blebs and wood fragments, scattered finely grained reddish-brown clay nodules, occasional large quartz grains.
200-205	<u>Sandy Silt</u> , light brown, scattered orange lenses and rare white clay inclusions, scattered carbonaceous matter and wood fragments, scattered to common finely to medium grained, sub-angular, clear quartz grains, coarsely textured, moderately compacted.
205-210	<u>Sandy Clay</u> , white to light grey, scattered finely grained clear quartz and orange quartz? aggregates, scattered carbonaceous wood fragments, rare brown clay inclusions, coarsely textured, moderately compacted.
210-215	<u>Sandy Clay</u> as 205-210 above.
215-220	<u>Clay</u> , dark to medium greyish brown, orange and fawn stringers, scattered white silt lenses, scattered carbonaceous wood fragments, scattered finely grained, sub-rounded clear quartz, medium textured, moderately compacted.
220-225	<u>Clay</u> , light grey and brown, white and orange stringers, scattered lenses of silt, scattered finely grained clear quartz and reddish-brown quartz? grains, occasional coarsely grained light brown quartz, rare carbonaceous matter, coarsely textured, moderately compacted.
225-230	<u>Clay</u> , as 220-225 above, scattered dark brown clay stringers, scattered carbonaceous matter.
230-235	<u>Clay</u> , as 225-230 above, scattered reddish-brown clay? clusters of nodules.
235-240	<u>Clay</u> , medium brown and grey, scattered fawn and white stringers, occasional orange and yellow inclusions, scattered carbonaceous wood fragments, scattered reddish-brown clay? clusters, scattered white and light brown rounded quartz pebbles up to 1/8" diameter, scattered sideritic? clay, rounded, pebbles, coarsely textured, moderately compacted. (sideritic)
240-245	<u>Clay</u> , as 235-240 above, scattered light brown silt stringers, no pebbles.
245-250	<u>Clay</u> , medium brown, light grey to white, scattered orange-brown stringers, rare orange small inclusions, scattered light brown silt and very finely grained sand lenses, scattered carbonaceous wood fragments, scattered sideritic clay inclusions and nodules, coarsely textured, moderately compacted.
250-255	<u>Clay</u> , as 245-250 above, becoming more silty, rare brown sideritic? nodules.
