## STRATIGRAPHIC DESCRIPTION

140-145	<u>Clay</u> , as 70-75 above.
145-150	<u>Clay</u> , as 70-75 above.
150-155	<u>Clay</u> , as 80-85 above.
155-160	<u>Clay</u> , as 80-85 above,
160-165	<u>Clay</u> , medium to dark brown, scattered inclusions of mottled red and white clay and occasional yellowish-orange clay inclusions, rare carbonaceous wood fragments, finely to medium textured, moderately compacted.
165-170	<u>Clay</u> , medium orange-brown, medium to coarsely textured, moderately compacted.
170-175	<u>Clay</u> , medium orange-brown and dark brown, medium to coarsely textured, moderately compacted.
175-180	<u>Clay</u> , dark brown, finely textured, moderately compacted.
180-185	<u>Clay</u> , dark brown, scattered orange brown, light fawn and orange inclusions, finely to medium textured, moderately compacted.
185-190	<u>Clay</u> , dark brown, scattered orange streaks and inclusions, finely textured, moderately compacted.
190-195	<u>Clay</u> , medium to dark brown, scattered orange and white clay inclusions, medium to coarsely textured, moderately compacted.
195-200	<u>Clay</u> , medium brown with orange-brown and orange tinges, medium textured, moderately compacted.
200-205	<u>Clay</u> , very light grey, scattered orange patches, scattered sideritic nodules and finely grained quartz, scattered reddish brown sideritic clay fragments and inclusions, medium textured, moderately compacted.
205-210	<u>Clay</u> , light to medium grey, scattered orange patches, scattered red-brown sideritic clay inclusions, scattered medium grained quartz, medium textured, moderately compacted.
210-215	<u>Clay</u> , as 205-210 above, rare ferruginous nodules.
215-220	<u>Silt</u> , white, scattered light and medium grey clay stringers, coarsely textured, moderately compacted.
220-225	<u>Silt</u> , light to medium brown, scattered medium grey and white clay stringers, scattered carbonaceous-wood fragments, medium textured, moderately compacted.
225-230	<u>Silt</u> , as 220-225 above, only finely textured.
230-235	<u>Silt</u> , as 225-230 above.
235-240	<u>Silt</u> , as 225-230 above, scattered reddish-orange sideritic clay fragments.
240-245	<u>Clay</u> , light to medium grey, coarsely textured, moderately compacted.
245-250	<u>Clay</u> , light to medium grey, coarsely textured, moderately compacted.
250-255	<u>Clay</u> , as 240-245 above, scattered orange-brown siderite nodule clusters.
