

DEPTH	STRATIGRAPHIC DESCRIPTION
135-140	<u>Clay</u> , as 105-110 above.
140-145	<u>Clay</u> , as 120-125 above.
145-150	<u>Silt</u> , very light grey, scattered dark brown and grey clay stringers, medium to coarsely textured, moderately compacted.
150-155	<u>Silt</u> , as 145-150 above, common dark brown to black clay stringers.
155-160	<u>Clay</u> , dark brown, light grey, common silt stringers, (as 145-150 above), finely textured, moderately compacted.
160-165	<u>Clay</u> , as 155-160 above.
165-170	<u>Clay</u> , as 40-50 above.
170-175	<u>Silt</u> , light to medium brown, grey and scattered orange, common carbonaceous wood fragments, coarsely textured, moderately compacted.
175-180	<u>Silty Sand</u> , clear, light brown, medium to coarse grained, sub-angular, poorly sorted, quartz, extremely dirty, common light brown silty and white and grey clayey interstitial material, scattered stringers of medium grey, plastic clay, scattered inclusions of carbonaceous matter, moderately to loosely compacted.
180-185	<u>Silty Sand</u> , as 175-180 above, common carbonaceous wood fragments, scattered orange ferruginous? interstitial material.
185-190	<u>Clay</u> , medium and dark grey and brown, scattered white common carbonaceous wood fragments, occasional orange ferruginous? staining, medium to coarsely textured, moderately compacted.
190-195	<u>Clay</u> , as 185-190 above.
195-200	<u>Sand</u> , clear, light brown, medium to coarsely grained, sub-angular, medium sorted, quartz, very dirty, common grey clayey and light brown silty interstitial material, scattered carbonaceous inclusions and wood fragments, loosely to moderately compacted.
200-205	<u>Sand</u> , as 195-200 above, rare orange staining on a few grains.
205-210	<u>Carbonaceous Clay</u> , black, scattered medium brown clay stringers, common carbonaceous wood fragments, coarsely textured, moderately compacted.
210-215	<u>Carbonaceous Mud</u> , as 210-215 above.
215-220	<u>Carbonaceous Mud</u> , black medium textured, moderately compacted.
220-225	<u>Carbonaceous Mud</u> , as 215-220 above.
225-230	<u>Carbonaceous Mud</u> , as 215-220 above.
230-235	<u>Carbonaceous Mud</u> , black, rare very light fawn clay stringers, medium textured, moderately compacted.
235-240	<u>Carbonaceous Mud</u> , as 230-235 above.
240-245	<u>Carbonaceous Mud</u> , as 230-235 above, rare orange clay inclusions.
245-250	<u>Carbonaceous Mud</u> , as 230-235 above.
250-255	<u>Carbonaceous Mud</u> , as 230-235 above.
255-260	<u>Carbonaceous Mud</u> , as 240-245 above.
