

DEPTH	STRATIGRAPHIC DESCRIPTION
300-305	<u>Clay</u> , mottled, white, light to medium brown, orange, rare red, scattered coarse grained clear quartz, finely to medium textured, moderately compacted.
305-310	<u>Clay</u> , mottled, white, light, medium and dark grey, medium orange-brown and orange, scattered carbonaceous wood fragments, scattered dark brown limonitic clay inclusions, finely to medium textured, moderately compacted.
310-315	<u>Clay</u> , as 305-310 above.
315-320	<u>Clay</u> , very light grey and orange stringers, rare limonitic coated clay inclusions, rare carbonaceous wood fragments, finely textured, moderately compacted.
320-325	<u>Clay</u> , very light grey, orange, medium grey, stringers, scattered silty lenses, scattered carbonaceous wood fragments and matter, occasional dark reddish-brown ferruginous? staining, finely to medium textured, moderately compacted.
325-330	<u>Clay</u> , as 320-325 above.
330-335	<u>Clay</u> , light grey, orange, yellow stringers and minor red streaks, scattered carbonaceous matter and wood fragments, scattered dark reddish-brown rounded ferruginous nodules, rare orange silt lenses, medium textured, moderately compacted.
335-340	<u>Clay</u> , as 330-335 above.
340-345	<u>Clay</u> , as 330-335 above, occasional medium grained quartz.
345-350	<u>Clay</u> , mottled, very light grey, orange-brown and orange, rare medium to dark grey, scattered carbonaceous wood fragments, scattered to common orange limonitic nodules and staining, rare fine to medium grained quartz, medium to coarsely textured, moderately compacted.
350-355	<u>Clay</u> , light and medium to dark grey, orange and medium brown, scattered carbonaceous streaks and wood fragments, scattered dark reddish-brown rounded ferruginous nodules, finely to medium textured, moderately compacted.
355-360	<u>Clay</u> , mottled, white, light grey, dark grey, yellow, orange, scattered carbonaceous wood fragments, medium textured, moderately compacted.
360-365	<u>Clay</u> , mottled, white, very light grey, light brown, yellow orange, scattered to rare silty patches, scattered carbonaceous wood fragments, scattered limonitic coated rounded ferruginous clay nodules and fragments, finely to medium textured, moderately compacted.
365-370	<u>Clay</u> , predominantly white and very light grey, scattered lenses and inclusions of yellow and orange, scattered carbonaceous streaks and wood fragments, scattered patches or rusty orange silt containing rounded limonitic clay nodules, medium textured, moderately compacted.
370-375	<u>Clay</u> , mottled, white, light grey, medium greyish-brown, light brown, yellow and orange, scattered carbonaceous wood fragments, scattered dark reddish-brown, rounded, ferruginous nodules, scattered ferruginous staining, medium textured, moderately compacted.
