

DEPTH	STRATIGRAPHIC DESCRIPTION
145-150	<u>Clay</u> , dark brown, rare to scattered light to medium fawn stringers, scattered reddish-orange and white inclusions, finely textured, moderately compacted.
150-155	<u>Clay</u> , as 145-150 above.
155-160	<u>Clay</u> , dark brown, finely textured, moderately to well compacted.
160-165	<u>Clay</u> , as 155-160 above.
165-170	<u>Clay</u> , mottled medium to dark orange-brown, scattered to rare red, orange and white small inclusions, scattered carbonaceous wood fragments, finely textured, moderately compacted.
170-175	<u>Clay</u> , light fawn, scattered yellow, pink, orange, dark brown, light grey stringers and streaks, scattered red orange and white inclusions, fine to medium textured, moderately compacted.
175-180	<u>Sand</u> , very coarse grained, sub-angular, medium to well sorted quartz, very dirty, common light brown and silty and white clayey interstitial material, scattered carbonaceous wood fragments, friable, loosely to moderately compacted.
180-185	<u>Clay</u> , medium to dark brown, scattered light tan, yellow and pink stringers and inclusions, medium textured, moderately compacted.
185-190	<u>Clay</u> , medium to dark brown, scattered orange lenses and inclusions, common carbonaceous wood fragments coated with orange (limonitic?) clay, medium textured, moderately compacted.
190-195	<u>Clay</u> , as 185-190 above.
195-200	<u>Clay</u> , as 185-190 above, only dark brown and scattered reddish-orange clay inclusions, common (limonitic?) coatings.
200-205	<u>Clay</u> , medium grey and light to medium brown, scattered white and orange clay inclusions, finely to medium textured, moderately compacted.
205-210	<u>Clay</u> , medium brown and orange-brown, scattered orange (limonitic?) patches and clay inclusions, medium textured, moderately compacted.
210-215	<u>Clay</u> , as 205-210 above, scattered carbonaceous wood fragments.
215-220	<u>Clay</u> , as 210-215 above, rare limonitic coated nodules.
220-225	<u>Clay</u> , 205-210 above.
225-230	<u>Silty Clay</u> , light to medium grey, scattered dark brown sideritic clay fragments, rare yellow and orange patches and inclusions, coarsely textured, moderately compacted.
230-235	<u>Silty Clay</u> , as 225-230 above, but no sideritic clay fragments, scattered medium to dark grey clay lenses.
235-240	<u>Silt</u> , light grey and brown, common interbeds of medium grey and brown and minor orange clay, scattered carbonaceous wood fragments, rare coarse grains of quartz, occasional limonitic coated ferruginous nodules, coarsely textured, moderately compacted.
