

198

DEPTH	STRATIGRAPHIC DESCRIPTION
90-95	<u>Gravel</u> , as 85-90 above.
95-100	<u>Gravel</u> , as 85-90 above.
100-105	<u>Gravel</u> , as 85-90 above.
105-110	<u>Silty Gravel</u> , clear, white, yellow and orange pebbles up to 1/8" diameter of quartz and quartzite, common angular fragments and sub-rounded pebbles of basalt or dolerite set in light brown, orange and medium grey silty, clayey and sandy matrix.
110-115	<u>Silt</u> , medium grey, scattered white and orange patches and inclusions, scattered fine to coarse grained quartz, scattered angular fragments of black basalt and light yellow and clear quartzite, medium textured, moderately compacted.
115-120	<u>Silt</u> , as 110-115 above, rare mica.
120-125	<u>Silt</u> , as 110-115 above.
125-130	<u>Silt</u> , as 110-115 above.
130-135	<u>Silt</u> , as 110-115 above.
135-140	<u>Silt</u> , as 110-115 above.
140-145	<u>Silt</u> , as 110-115 above.
145-150	<u>Silt</u> , medium grey and brown, scattered dark grey shale fragments and black carbonaceous shale fragments, scattered angular fragments of dolerite.
150-155	<u>Silt</u> , as 145-150 above.
155-160	<u>Silt</u> , as 145-150 above.
160-180	Missing.
180-185	<u>Silt</u> , light grey, scattered carbonaceous matter, rare very coarsely grained of sub-rounded quartz, medium textured, moderately compacted.
185-190	<u>Silt</u> , light grey to white, scattered stringers of dark brown clay, rare orange clay inclusions, scattered carbonaceous wood fragments, scattered greenish grey patches, rare angular, finely to medium grained quartz, medium textured, moderately compacted.
190-195	<u>Clay</u> , medium brown, scattered lenses and patches of white and orange clay and silt, scattered carbonaceous wood fragments, scattered clear coarsely grained, sub-rounded quartz, medium to coarsely textured, moderately compacted.
195-200	<u>Clay</u> as 190-195 above.
200-205	<u>Clay</u> as 190-195 above.
205-210	<u>Clay</u> , as 190-195 above, rare angular fragments of orange quartzite.
210-215	<u>Clay</u> , as 205-210 above.
215-220	<u>Silt</u> , medium brown, scattered light grey to white stringers, scattered dark grey to black carbonaceous clay? inclusions, rare carbonaceous wood fragments, scattered black igneous pebbles up to 1/16" diameter, scattered fragments of indurated orange and brown silt, medium textured, moderately compacted.
