STRATIGRAPHIC DESCRIPTION

692262

0-5	<u>Sand</u> , light brown, yellow, orange, grey, clear, coarse to very coarse grained, sub-rounded to angular fragments, quartz, very dirty common light brown and orange silty interstitial material, common dolerite fragments, scattered black quartz? friable, loosely compacted, orange ferruginous staining on 50% of quartz grain.
5-10	<u>Gravel Sand</u> , very coarse grain and pebbles up to 1/8" diameter sub-angular to sub-rounded, medium sorted, dolerite grains set in light orange-brown silty matrix, loosely compacted.
10-15	<u>Gravel Sand</u> , as 5-10 above.
15-20	<u>Gravel Sand</u> , very coarse grain and pebbles up to 1/8" diameter, sub-angular to sub-rounded, medium sorted, dolerite grains set in light orange-brown silty matrix, loosely compacted, common waxy medium orange-tan clay pebbles set in silty matrix.
20-25	<u>Gravel Sand</u> , as 15-20 above.
25-30	<u>Gravel Sand</u> , as 15-20 above.
30-35	<u>Gravel Sand</u> , as 15-20 above.
35-40	<u>Gravel Sand</u> , as 15-20 above.
40-45	<u>Clay</u> , yellowish to orange-brown, rare white lenses, scattered coarse grain of sub-angular to sub-rounded dolerite, medium textured, moderately compacted.
45-50	<u>Clay</u> , as 40-45 above.
50-55	<u>Clay</u> , yellowish to orange-brown, rare white lenses, scattered coarse grain of sub-angular to sub-rounded dolerite, medium textured, moderately compacted, scattered red-brown ferruginous clay nodules.
55-60	<u>Clay</u> , yellow-brown, light grey stringers, finely textured, moderately compacted.
60-65	<u>Clay</u> , as 55-60 above.
65-70	<u>Clay</u> , medium orange-brown, scattered red brown sideritic clay grains and scattered coarse grained orange quartz, finely textured, moderately compacted.
70-75	<u>Clay</u> , medium orange-brown and brown, scattered angular large fragments of dolerite, finely textured, moderately compacted.
75-80	<u>Silty Clay</u> , medium to dark brown, medium orange brown, and minor lithic medium grey silt stringers, coarsely textured, moderately compacted.
80-85	<u>Pebble Clay</u> , orange, common sub-angular to angular pebbles of dolerite, coarsely textured, moderately compacted.
85-90	<u>Silt</u> , medium to dark brown, orange, white, grey common reddish black coarse to medium coarsely textured, loosely to moderately compacted.
90-95	<u>Silty Clay</u> , very dark reddish brown to black, may be carbonaceous? scattered white and orange clay specks, coarsely textured, moderately compacted.
