STRATIGRAPHIC DESCRIPTION 692267

0-5	<u>Clay</u> , mottled, medium brown, orange, medium grey, scattered fine to medium clear quartz grains, coarsely textured, moderately compacted.
5-10	<u>Clay</u> , light yellowish brown, rare medium to dark brown clay, minute clay inclusions, medium textured, moderately compacted.
10-15	<u>Clay</u> , medium yellowish brown, scattered dark brown and grey lenses scattered reddish-brown ferruginous? clay inclusions
15-20	<u>Clay</u> , mottled brownish-orange and medium greyish-brown scattered medium grained clear quartz, coarsely textured, moderately compacted
20-25	<u>Silty Clay</u> , orange, dark greyish brown and rare fawn stringers and lenses, scattered stringers of silt, scattered fine to medium quartz, coarsely textured, moderately compacted.
25-30	<u>Clay</u> , medium grey, scattered coarse grains of ferruginous clay, medium to coarsely textured, moderately compacted.
30-35	<u>Clay</u> , mottled medium grey and orange, silty in places, occasional medium brown quartz clusters, rare reddish-brown ferruginous clay pebbles, coarsely textured, moderately compacted.
35-40	<u>Clay</u> , light grey, brown, orange, medium brown streaks and stringers, silty stringers, rare mica, scattered orange-brown limonitic clay nodules, coarsely textured, moderately compacted.
40-45	<u>Clay</u> , light grey, medium grey and fawn, scattered sub-rounded, angular, yellow and orange hard silt pebble fragments, coarsely textured, moderately compacted.
45-50	<u>Clay</u> as 40-45 above.
50-55	<u>Sand</u> , predominantly orange and clear, minor light brown, yellow finely to medium grained, sub-angular, medium sorted quartz, very dirty, common orange clayey and light brown silty interstitial material, scattered carbonaceous wood fragments, scattered lenses of orange silt, loosely compacted.
55-60	<u>Sand</u> , as 50-55 above, common carbonaceous wood fragments.
60-65	<u>Clay</u> , medium brown, grey, orange, yellow and stringers, silty in places, common carbonaceous wood fragments (40%), coarsely textured, moderate to loosely compacted.
65-70	<u>Clay</u> , as 60-65 above (25%), carbonaceous wood fragments 75%
70-75	<u>Clay</u> , as 65-75 above
75-80	<u>Clay</u> , mottled medium light grey, scattered carbonaceous wood fragments and carbonaceous mud.
80-85	<u>Clay</u> , dark brown to black, common carbonaceous black clay and wood fragments, scattered lenses of orange silt, finely textured, moderately compacted.
85-90	<u>Clay</u> , as 80-85 above and medium grey clay stringers.
