

231

BORE No.9

Core No.1

692286

241' - 245'

Dolerite.

Core No.2

215' - 232'

Vesicular basalt, common inclusions of indurated clays and silts and carbonaceous material formed to charcoal.

Core No.3

194' - 196'

Dolerite.

Core No.4

232' - 241'

Dolerite.

Core No.5

188' - 192'

Dolerite.

Recovered 6'6"

Clay light bluish gray, massive, compacted, showing irregular pieces due to drying and shrinkage, occasional larger and smaller blue and white finely laminated, well sorted, sub-angular quartz grains, some embedded white mica, irregularly distributed, and also thin, thin, finely, and carbonaceous specks.

192' - 194'

Core No.1

191' - 201'

Recovered 10'

Dolerite, dark gray.

Core No.2

170' - 181'

Recovered 11'

Clay, mottled orange, siliceous, gray, scattered carbonaceous blebs, coarsely textured, moderately compacted.

160'

Dolerite, as above.

150'

Core No.1

140'

Recovered 11'

Basalt, black, common indurated cement inclusions, sample taken.

130'

Core No.1 (Sample taken at bottom of)

120'

Sample taken.
