NOTE:

1. The Misty Valley Grid was sampled during the 1973-74 summer.
The Mt.Lindsay Grid was sampled during the 1974-75 summer.

The lower limit of detection was different for the two grids: Misty Valley: 10 p.p.m., Mt. Lindsay: 5 p.p.m.

2. The strong anomaly on MV1 800/900 m.E was not repeatable and was probably due to contamination.
