

061
c. SUMMARY.

The total wrigglite resource is

"indicated" tonnage 15,500,000
grade approx. 18% CaF₂, 0.1% Sn, 0.08% W

Overburden over "indicated" wrigglite 11,200,000 tonnes

Ratio "indicated" wrigglite to overburden 1.4: 1

(Data for inferred wrigglite is not reliable and so is not quoted here).

The deposit is probably the largest single fluorite resource in Australia.
