

NOTES

Sample No's

03/0701/

MO3 Chip sample of wrigglite from 3 outcrops at Shepherd and Murphy Mine.

MO4 Tailings Shepherd and Murphy Mine. Consists of 1/8 inch mixture of quartz, wrigglite, etc.

MO5 Garnet rich skarn, Shepherd and Murphy Mine, exact locality unknown.

MO6 Pale calc-silicate rock, Shepherd and Murphy Mine, exact locality unknown.

Fanders' descriptions of MO5, MO6 are more typical of wrigglite. He has probably examined wrigglite occurring in the specimens interlayered with the calc-silicate rock or garnet skarn.

For analyses of these rocks see Appendix 5.
