Recently, I have read Amdel Report No. 1178 "Production of hydrogen fluoride" by J.M. Clayton dated August, 1977. In the light of this report, please would you advise me if Moina fluorite has any potential to be treated by method 3: "Production of HF by pyrohydrolysis of fluorite ore". If there is any chance that pyrohydrolysis may be able to extract the fluorine from the Moina fluorite I would like to discuss the subject with you with object of getting some more work done.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'A.H. Bartlett', with a large, sweeping flourish extending to the right.
