

**LEGEND:**

50 Cu ppm	ANALYTICAL METHODS: Cu, Pb and Zn by AAS following conc. HCL leach and HCL/HNO <sub>3</sub> leach in latter stages for 1 hour at 0.25g sample. A.C.S. Laboratories Pty. LTD.	Anomalous Values - Drainage Samples: (colour marked from sample location upstream to next location)	
20 Pb ppm		Copper > 5 ppm	(4.0 % of total population)
20 Zn ppm		Lead > 65 ppm	(2.0 % of total population)
		Zinc > 55 ppm	(2.0 % of total population)

**NOTE:**  
This map has been compiled from enlargements of the Tasmanian Lands Department's 1:50,000 scale topographic machine plots.
