

Age	Name	Rock Types
Recent	5.	Reworked glacial deposits.
Pleistocene	4.	Unsorted glacial debris.
Ordovician	3. Owen Conglomerate.	Massive pink conglomerate & quartzite.
Cambrian	2. Mt. Read Volcanics	Rhyolitic, andesitic & trachytic lavas & pyroclastics. Local small basaltic & granophyric intrusives.
	1. Farrell Group?	Slates, greywackes & xenotuff, acid-intermediate pyroclastics.

1. Farrell Group?

The Group outcrops in a 400m wide band between the Ordovician Owen Conglomerate on Mt. Murchison and the Mt. Read Volcanics to the west. The contact between
