

VI. DATA PRESENTATION

The dipole-dipole lines are presented in pseudosection form of apparent chargeability and apparent resistivity at a scale of 1:4,000. The apparent chargeabilities are contoured every 5.0 milliseconds and the apparent resistivities at a logarithmic interval of 1.00, 1.50, 2.50, 4.00, 6.50 and 10.00 per cycle.
