

Current Measurement: Analog meter, accuracy +/-3%

Output phase: Polarity of output indicated
on front panel

Operating temperature: ambient - 15°C to 60°C
(+ 5°F to + 140°F)

Time cycle: symmetrical period, range of
quarter period, 0.5 to 10
seconds +/- 2% over temperature
range factory adjustable.

Fuse data: Low voltage circuits type
3AG 0.5 A SB

High voltage circuits type
3AB ceramic 20A

Fan type 3AG 0.2 A SB

Mechanical Specifications

Construction: Epoxy painted aluminium

Ventilation: Forced air internal fan

Connectors: Input MS3102E-18-3P

Output Supercon RS25GR

Dimensions: Case height 26.7 centimeters (10.5 inches)

Case width 40.6 centimeters (16 inches)

Case depth 29.2 centimeters (11.5 inches)

Weight without case 13.6 kilograms
(30 pounds).

Complete with case 20.4 kilograms
(45 pounds).
