

Contour interval: 100γ (with 500γ index)
Survey by R. de Caeste using G-816 Magnetometer SN 6264
Readings every 10m on 120m spaced lines.
Variable - not repeatable within 20-30γ so reading averaged.
NR - no reading, dangerous ground, or steep slopes, or near scrap iron.

Revision A - 6 fill in lines added after survey 21-3-80
