

- 4.3 Intensive surface prospecting followed by diamond drill target selection will be carried out over grid GAT. Geological mapping, geochemical sampling, ground magnetic, PEM and I.P. surveys will be carried out. This work should link up with that just completed on grid GAP west.
- 4.4 The work programme just completed on GAP west will be extended northwards into grid GAT.
- 4.5 New access tracks, the railway line and main water courses in the GAT area will be geologically mapped, and, where appropriate, geochemically sampled.
- 4.6 Further geological mapping will be carried out in the SW sector of the GAP grid to establish the presence or otherwise of a mineralised fault similar to the Bassett-Federal structure in the area.

Proposed Budget January-June 1981

| | |
|-------------------------------|------------------|
| Arthur River (Section 1) | 12,703 |
| Ramsay (Section 2) | 247,943 |
| Chester-Pinnacles (Section 4) | 73,587 |
| East Renison (Section 6) | <u>503,854</u> |
| Total | <u>\$838,087</u> |
