181.0	3.0	3.0	100%	181.0 - 182.5	Interbedded black carbonaceous mudstone, grey mudstone and dull medium greenish-grey fine-grained sandstone. Much of the core is deformed, shows variable bedding to core axis angles and microfaulting.	Numerous thin quartz and carbonate veinlets cut the core.	182.3 B.C.A: 55° facing down hole from indistinct bedding
