

Plans 1-4 and 10-11 are being compiled by Mount Lyell, E.Z. and Getty personnel, while Plan 5 will include data from a Landsat structural interpretation carried out by Technical and Field Surveys Pty. Ltd. The geophysical and geochemical plans are respectively being compiled by consultants Dr. J. Bishop (Mitre Geophysics) and Dr. A. S. Joyce (Geobase). Plan 8 is the product of a mineral occurrence card system originally compiled by G. Drake (Getty Oil) and later expanded and computerised by Technical and Field Surveys Pty. Ltd. Plan 9 is being compiled by D. Catley (Getty Oil) based on mineral occurrence data interpretation by G. Drake. Plan 12 is derived from the regional alteration study being carried out by Dr. C. Eastoe (University of Tasmania) - refer to Section 3.4 for further details.
