TASMANIAN AEROMAGNETIC &

RADIOMETRIC SURVEYS

PROGRESS REPORT II - BLOCK NO. 1

1.0 Introduction. We have examined the inflight analogue records for the profiles covering Block No. 1, specified on the 1 inch to 1 mile aeromagnetic transparency. The report is set out on a sheet-by-sheet basis. The anomalies have been numbered as:

(LINE NUMBER) . (NEAREST FIDUCIAL)

for anomalies within the sheet boundaries.

2.0 Summary for Block 1. The results for this block are a little disappointing in that no really strong anomalies, or anomalies clearly unrelated to helicopter clearance variations, have been found. A list of the more intriguing anomalies follows, and reference can be made to the description and records which follow.

SHEET	ANOMALY LIST
4041	333.2982
4141	32.6977, 44.2695, 475
4241	55.2073, 60.1109, 61.1012
