

052

- Drilling;
a low priority area; detailed geological mapping and bedrock geochemistry should ultimately be carried out.

10.2. Globe Grid

- Geophysics;
extension of IP coverage over southern end of lines 160E and 120E. (low priority)

- Drilling;
two to three holes and 300m of drilling are proposed with the intention of outlining extensions of quartz-tourmaline alteration to the north and west of the old workings.

- Drilling details;

first hole	co-ordinates	5359450N,	353315E
	length	90 metres	
	bearing	355 AMG	
	dip	70°	
second hole	co-ordinates	5359490N,	353350E
	length	110 metres	
	bearing	070 AM6	
	dip	70°	
third hole	co-ordinates	359425N,	353325E
	length	100 metres	
	bearing	120 AM6	
	dip	70°
