ELECTROLYTIC ZINC CO. OF A'ASIA LTD.
ROSEBERY - TASMANIA

DIAMOND DRILL CORE RECORD

HOLE No. CHP 236

A 11241

FOOTAGE		ROCK DESCRIPTION	MINERALISATION	SAMPLE No.	8-13 FROM	14-19 TO	CORE REC'D	ASSAY DATA							CORE REC'D		
FROM	TO							Sample Length	20-25 Pb%	26-31 Zn%	32-37 Cu%	38-43 Ag - g/t	44-49 Au - g/t	50-55 Fe%	RUN	SHORT	
28.5	36.0	Dark grey, fine to medium grained volcanic tuff with some thin siltstone beds. Siltstone fragments to 2mm in coarser units. Some thin irregular quartz-carbonate veining	Very minor pyrrhotite in narrow breccia zone at 29.3 - healed with quartz-carbonate														
36.0	40.1	Dark grey, fine to medium grained volcanic arenite with some siltstone beds. Arenites contain numerous pale green lithic fragments 2-4mm. Scattered, irregular quartz-carbonate veins. Core broken and oxidized around 37.0															
40.1	43.7	Dark grey, medium grained volcanic arenite with lithic fragments as above. Some laminated siltstone. Core brecciated and healed with 5cm quartz at 40.2, 40.5, 40.7 and 42.1. Also 4.0"															
43.7	46.3	Dark grey siltstone and fine grained volcanic arenite. Irregular quartz veining	1cm quartz + chalcopyrite at 45.3 2cm bleached quartz + pyrite + arsenopyrite at 45.4
