

- 330.0 Murchison Granite.

Assays:

No assays were carried out on this hole.

A geological map, revised from Meares et. al. (1982), using the drilling results obtained this season, is shown in Figure 10. This map also incorporates the Selina-Red Hills regional mapping, the rest of which is displayed on Figures 13 and 18. The I.P. chargeability anomalies, glacial cover and HEC Anthony Scheme proposed Dam site and lake are shown on Figure 10 as well.
