

PD 83 JC - 09

<u>From (m)</u>	<u>To (m)</u>	
0	4.0	Dolerite (slightly and moderately weathered), rubble, siliceous mudstone and wood fragments, and quartz sand
4.0	6.0	Dolerite - medium grained, slightly/moderately weathered
6.0	10.0	Dolerite - medium grained, slightly weathered to fresh
10.0	12.0	Dolerite - medium grained, chloritic, and with veinlets of green clay
12.0	25.0	Dolerite - medium grained

EOH

Comments

Although the hole was not intentionally collared over dolerite, it was drilled to 25m to ascertain any variation in the grain size of the dolerite, but which at the depth of 25m did not indicate the sill would be < 50m in thickness; accordingly the hole was abandoned at 25m.
