1. INTRODUCTION

This report details the results of exploration conducted by Getty Oil Development Company Limited (GODC) on the 116 square kilometre Rosebery East area of the Mt. Black EL 1/62, in the period 5th August, 1983 to 30th June, 1984.

(See Figure 1)

GODC commenced initial investigation of the area on 5th August, 1983, prior to the final signing of the Mt. Black Joint Venture Supplementary Agreement on 15th November, 1983.

Exploration was conducted both on areas of interest known from previous Electrolytic Zinc Company of Australasia Limited (EZ Company) work, Cutty Sark, Bobadil, White Spur, and areas outlined by an airborne EM survey; Murchison River, Mt. Black, Stitt.
