

**DOWN-HOLE GEOLOGICAL LEGEND**

- SCREE Unconsolidated, predominantly andesites
- ANDESITES Porphyritic, altered, mineralized
- DACITIC PYROCLASTICS - MASS DEBRIS DEPOSITS Prominent quartz-phyric, often lithic, variably altered & mineralized
- MASSIVE PYROCLASTICS, massive uniform felsic pyroclastics, weakly altered and mineralized.
- TUFFACEOUS SEDIMENTS Mixed, predominantly coarser epiclastic sediments, mineralized
- SHALES Black-grey with minor coarser epiclastics, variably mineralized
- Bedding to core axis direction
- Pyroclastic foliation to core axis direction
- Structural zone ; fault, broken core etc.
