

- DOWN HOLE GEOLOGICAL LEGEND**
- DACTIC PYROCLASTICS - MASS DEBRIS DEPOSITS  
quartz-phyre lithic pyroclastics, some welded ignimbrites, variable chI stockwork, minor mineralization
  - SHALES - Predominantly dark grey massive (ashy) with minor coarser epiclastics, not graphitic, mostly mineralized
  - MIXED EPICLASTICS - Predominantly tuffaceous siltstone-sandstone, often reworked pyroclastics, minor shales, altered and mineralized
  - MASSIVE PYROCLASTICS - Uniform, structureless felsic pyroclastics, weakly altered, mostly unmineralized
  - Bedding to core axis direction
  - Pyroclastic foliation to core axis direction
  - Structural zone fault, broken core etc.
